

This resource brings together key information/teachings/ideas the students need in a certain topic area.

The Info-Mat is useful in many ways and the same mat can be used to scaffold/extend learning over multiple lesson on a topic.

How this resource can be used:

- Students can focus on and search for information on certain texts.
- Key word help.
- As a basis for comprehension activities.
- Questions on the Info-Mat can be researched using other sources and extend learning.
- Support students to make key links between beliefs and practices.
- Other resources from Eduqas can be printed out and the Info-Mat would support these activities.

Practical Advice:

The Info-Mat is designed to be printed out on A3 paper in colour and given to each student at the beginning of a topic. Other digital resources have been designed to be used in conjunction with the Info-Mat in this topic area – however they can be used separately as well.
