eduqas wjec cbac

Aim

Understanding that economic development is more than just income.

Tasks

Task 1: Capita data

Using the Chad, Kenya and Swaziland Data document, analyse the information and discuss the following:

1. Comparison of GDP per capita.

2. Produce a template for the limitations of GDP per capita as a measure of living standards/development.

3. What development really means.

Task 2: CKS profiles

CKS profiles are taken from the BBC.

Summarise the data on each country to develop a broader background of the country.

Does this impact on the first impression of individual countries?

Statistics aren't everything.

Task 3:

Introduction to HDI. Using the link below:

http://www.economist.com/blogs/graphicdetail/2016/07/daily-chart-13

Using the methodology sheet, work through how to calculate HDI.

The link below may be useful in establishing a rationale:

https://www.youtube.com/watch?v=5lx_LEBPIpU

Task 4:

Calculate the HDI of different countries. Use the link to access the data:

http://hdr.undp.org/en/countries

And they can therefore check their own answers afterwards, or you can insert your own choices into the grid.

Task 5:

Use the GPD Task sheet.
